

CMC-27, CMC-35, CMC-36 (133'L x 46'W x 11.5'H) Draft = 3'

Description

The CMC 27, 35, and 36 are flat deck barges with square sides, flat bottom, raked bow and stern, with the stern rake fitted with fixed steering skags. The barges are ex-rock barges, with a poured concrete deck running from side to side and from approximately 4' aft of the bow and 6' forward of the stern. The barge is divided into eight watertight compartments by four transverse bulkheads and one longitudinal bulkhead that does not extend into the bow or stern rakes. Located on the bow of each is a cleat (centerline) with two single bits on each side.

**CMC-27 The starboard side has two smaller-diameter cruciform bits; one amidships and one approx. 30' from the stern. The port side has the same with an additional cruciform bit that is forward, approx. 75' from the bow. On the stern is a single cleat (centerline) and three single bits on each side.

**CMC-35 The starboard side has one additional smaller-diameter cruciform bit amidships. The stern has a single cleat (centerline) and three single bits on the port side and one double bit on the starboard side.

**CMC-36 On the stern is a single cleat (centerline) and three single bits on each side.
